

BIOAKTIV Far East

Brazil: A Trial at Languiru Coop Farm

BioAktiv Brasil did a trial using BioAktiv for Liquid Manure, they sold it as EcoAktiv, in a pig farm of Languiru Cooperative, a major producer of meat, poultry and dairy products in Brazil. They treat a house for 800 piglets with the BioAktiv product and use an untreated house of fattening pigs as control.

The average ammonia concentration in both houses over the trial period was as follows:

It is obvious that 800-piglet house treated with BioAktiv had much lower ammonia concentration.
