

# BIOAKTIV

## Reference: Dissolving of liquid manure deposits

**Site:** liquid manure basin in Kostomlaty nad Labem, concrete pit, three-fourths filled with deposits (no. 1), second basin with more than 1 m deposits and a volume of 800 m<sup>3</sup>

**Dosage:** 25 kg BioAktiv for liquid manure (per application), dissolved in 10,000 litres water  
**First** application: 15.8.2013, **Second** application: 30.8.2013,  
**Third** application: 20.9.2013, **Control: 3.10.2013**

**Costs:** Total amount 75 kg (per liquid manure basin), price per kilogramme 389 Czech crowns, i.e. **29,175 Czech crowns plus VAT per basin**

*Using BioAktiv the deposits were dissolved and a liquid mixture resulted which could then be pumped away with the liquid manure tanker. All conditions for application were fulfilled, that is dissolving the BioAktiv in pure water, applying below the encrustations with a pipe, recommended dosage and time intervals.*

**Head of pig breeding:** Engineer Josef Luka

**Head of Kostomlaty nad Labem agricultural operation:** Engineer Jaroslava Baráková,
