

## Winter Wheat

Trial with BioAktiv for plants, Sedlejev agricultural cooperative

Type: Bagou  
previous Crop: Rapeseed  
Field: Clay soil - 33 ha  
Applikation (ha): 1,5 l Cougar, 7 g Glean, Celstar1l, Capalo 1,2 l,  
**1 kg BioAktiv for plants,**  
2,5 q Ledek, 150 l DAM

with BioAktiv

without BioAktiv

BioAktiv was applied after the tillering phase together with the herbicide in the recommended dosage of 1 kg/ha. The photo was taken when the roots were dug up and examined on 4.5.2012. The difference was noticeable mainly with the root hairs and the strength of the root system.

Sedlejev, 31.05.2012
